**Canteen Thanks**

From Maureen

Many thanks to everyone who donated lovely slices, scones and cakes for the Riverina X-Country fundraiser.

Also, thanks to the ladies that helped serve at the canteen during the day, as well as Thiona Higgins who made a return visit as special guest chef to cook the BBQ, and Adrian Dunmore for his assistance with setting up, early that morning.

TOWER NAME: Cleotower
TOWER SITE: Ancient Egypt
TOWER CONSTRUCTION TEAM: Sophie Hay, Catriona Vickery and Calypso McKenzie (Currently absent)

Tower Details By: Catriona Vickery

TOWER STRENGTHS
Cleotower has an extremely strong base, and frame. Being a square pyramid, it has a lot more places to fit in straws, to make it more triangular, and stronger. We laid out large supports around the original, then more triangles. This made the whole tower stronger.

DIFFICULTIES CONSTRUCTING THE TOWER
My construction team and I had certain difficulties starting the base. We had trouble deciding whether it would be triangle or square, when Calypso pointed out a square base would supply more areas to place triangles. Making the rest was pretty straightforward, other than measuring lengths and sticking down the supports.

SOLUTION/S to DIFFICULTIES
As I stated above, the base was figured out by Calypso McKenzie, as our team was troubled to find a better shape for the base. Square was decided because it provides more places to strengthen it with triangles. Measuring was a dilemma, but was solved by two people holding the ruler and the other measuring. Sliding down was the easiest of all because we worked together.

Pictured above:
An outstanding report by Catriona Vickery, about the straw tower that her group constructed in Science.

TERRIFIC KID
North is full of terrific kids and Kiwanis award winner, Emma McCallum is certainly one. Emma received a bag of goodies from Kiwanis representative, Gloria Griffiths at morning assembly last Friday.

Nice one Em!
